

The Republic of China had shipped 120 containers comprising a mixture of food, blankets, clothing & shoes to Mombasa in Kenya. It was, however, through the co-operation and expertise of AMBA, that we were able to organize trucks to transport the bulk of this through to Uganda with the balance to Tanzania. AMBA's local knowledge and network of contacts helped us to dispatch these containers to their destinations, overcoming serious problems arising from a shortage of long-haul trucks due to UN humanitarian operations (to take food to areas suffering from serious drought and famine).

Following the changes that took place in what had previously been apartheid South Africa, many exiles started to return home to South Africa. Again, AMBA Forwarding was called upon to assist us in shipping personal belongings, office goods and vehicles from the UK back to South Africa.

The cooperation, support and friendship afforded by AMBA Forwarding (London) Ltd to the London-based Logistics Office of the African National Congress, during what were often difficult and stressful times, ensured we were able to carry out and complete operations benefiting the ANC and it's members.
